

Who is Florian Knaupp? Senior Solution Architect and Project Manager at **foryouandyourcustomers** in the area of Digital Supply Chain.

What Florian Knaupp can offer you

The use of synergies in the areas of solution design and project management are a decisive factor for the success of projects.

As Senior Solution Architect and Project Manager Florian Knaupp supports customers along the Digital Supply Chain in all areas of digitalization. In addition of the consulting function Florian fulfills the role of the project manager in order to make use of associated synergies, to keep an eye on objectives and thereby generate the greatest possible benefit for the customer. Florian sees the analysis of business processes as the basis for a successful path to a digital future. Based on the initial analysis optimization potentials can be identified and target processes can be defined which form the basis for a successful strategy of using new technologies.
