

The team of **foryouandyourcustomers** Melbourne is searching for an enthusiastic and inspiring **Product Master Data Management Consultant** (m/f/d).

Are you passionate about shaping and implementing cross-industry Product Master Data Management solutions? Do you like **working on intelligent solutions** that help business customers to exceed expectations? Would you like to join **foryouandyourcustomers** – a growing international digital consulting company, which is agile and ambitious in ensuring customers are happy and left with innovative solutions?

At foryouandyourcustomers we put people and their development at the centre of what we do.

Your role includes

- Analyse and document customer requirements.
- Assist with designing Product MDM solutions in accordance to agreed requirements and foryouandyourcustomers' methodology.
- Development of Product MDM applications including Business Rules, Web-UIs and Endpoints.
- Assisting with defining data models, product hierarchies, systems architectures.
- Identification of risks, issues, and problem areas and execution of steps to resolve them.
- Mentoring and supporting other team members.
- Ensuring a high-quality development process, including continuous quality process improvement.
- The role is based in Melbourne, but travel may be required (including potentially some travel to our overseas companies and customers).

Your skills and capabilities

- 2 to 5 years of technical experience working with MDM related applications, relational databases and scripting languages.

- Experience with a programming language such as JavaScript or Java is a must.
- Experience in defining and implementing Product MDM either as a developer or application consultant is beneficial.
- Experience in API Technologies (REST, SOAP), HTML, CSS, XSLT.
- Data Modelling knowledge is an advantage.
- Experience with Stibo's STEP solution is a strong plus.
- Skills in one or more in the following areas: e-commerce solutions, Retail IT solutions, Product Information Management (PIM), CRM, BI technologies.
- Customer focussed – driven by adding value to our customers.
- Able to perform in a team.
- Unrestricted entitlement to work and live in Australia (citizen/permanent resident).

What you can expect from us

- You will be integrated into our global team of experts, work with our customers, be part of the whole foryouandyourcustomers team and work on exciting international projects. You will also shape the future of foryouandyourcustomers in Australia, being a part of a team of technology experts growing our Australian customer base.
- Our customers are large and medium-sized B2C and B2B companies, many of them in the retail space with a strong focus on multichannel commerce.
- At foryouandyourcustomers, people are at the forefront of what we do, being both our customers and our employees. We support our employees to build knowledge, grow and gain independence – which is exactly what we do for our customers.
- We offer you a professional and inspiring working environment with lots of space for your personal and professional development.
