More about Sven-Sören Schwippert (svs) at <https://svs.foryouandyourcustomers.com>.

What Sven-Sören Schwippert offers

As a Data Scientist, Sven-Sören Schwippert is responsible for generating essential insights and useful knowledge from your company's existing data or external data sources. To achieve his goals, he performs exploratory and descriptive data analysis or uses advanced analytics methods such as machine learning. By using cloud solutions, he is able to automate work processes and scale necessary resources, so that even large amounts of data are not an obstacle but an advantage.

His Background

Since 2018 Sven is a part of team in Munich where he runs data analytics projects with a variety of customers in different industry sectors. Customer centricity means dealing flexibly with topics, methods and approaches in order to offer your company the best possible value. Therefore, he accompanies projects regarding data quality, data-driven customer and sales insights, data crawling, visualisation and cloud infrastructure.

After graduating from a technical college with focus on informatics he studied Psychology (bachelor) at University of Hagen, Sport Science (bachelor) as well as Biomechanics and Movement Analysis (master) at University of Gießen. Most fascinating for him was to gain knowledge out of the collected data.

As a student assistant, he carried out the data analysis for a publication in the sports-psychological research. While writing his master's thesis at University of Munich (Clinical Neuroscience) he did an internship in a Munich Start-Up

where he became passionate about business development and a data driven company approach.

Lay the groundwork in data quality and data accessibility to enable a data-driven future for your organization.
