

Who is **Anthony Tiemens**? He is a Master Data Management Consultant at **foryouandyourcustomers** helping organisations understand, improve, and manage their data.

More about Anthony Tiemens (ajt) at <https://ajt.foryouandyourcustomers.com>.

What Anthony Tiemens offers

As a Master Data Management (MDM) Consultant, Anthony combines his technical skills and business acumen, acquired during more than 20 years of software and data management experience in various organisations. His broad experience enables him to quickly understand and appreciate the context and needs of his clients.

Anthony has an eye for detail, is analytical, process driven, and always looking out for improvements, whether it is in documentation, diagrams, data, software or business processes.

He enjoys collaborating effectively with clients and teammates to achieve great quality solutions for his customers.

“The technology you use impresses no one. The experience you create with it is everything.”

His Background

Anthony started his career as a software developer on mainframe and mid-range computer platforms in the Automotive and Financial Services industries. He later specialised in Oracle software and database development. He worked with this technology for several years, developing solutions, and managing data in the government, utilities, and retail sectors. During this time, he also performed related roles as team lead, mentor and project manager.

Extending beyond classic relational databases, Anthony specialised in data migration of geographic information systems (GIS) involving both spatial and non-spatial data. This included projects in Australia and then for a couple of years in The Netherlands, Anthony's ancestral home country.

Recently Anthony focused on data management in the financial, superannuation, and government sectors, covering data analysis, data governance, data modelling, and information architecture roles for CRM, MDM, and enterprise data platform systems.

Anthony holds university degrees in computing and business management.

He joined the foryouandyourcustomers team in Melbourne in February 2021 and has since been involved in large scale Stibo implementation projects.
